

Loss of Control and Aeronautical Decision Making

Many Loss of Control accidents have occurred where airmen were unfamiliar with the visual or cockpit instrument cues for their aircraft in flight attitude as; level, climbs, descent, and turns. Mr. Spencer Campbell will discuss the importance of having the aircraft trimmed to a level flight 'hands off'. We will also discuss typical distractions that lead to loss of control, recovery from unusual flight attitude, Human factors relating to disorientation, and situational awareness of the terrain.

Directions: From I-5 North or South, Take exit 161 follow signs for Boeing Field, Take the 1st right onto Perimeter Rd S, Slight left to stay on Perimeter Rd S, destination will be on the right.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
